
Project 4

Hot Dog or Not Hot Dog

Using a CNN for our SeeFood App

Team 3: Sarah Roe, Mridul Sharma, Manuel Flores

Table of contents

01

Introduction

SeeFood = Shazam for Food

Introduction

Problem:

- Binary classification: identifying images of hot dogs for our SeeFood App

Data

- ~2,000 hot dog JPGs and ~2,000 non-hot dog JPGs

Solution:

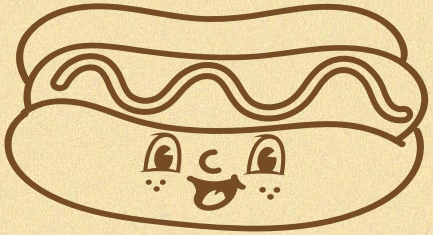
- CNN-powered image classifier model

Deliverables:

- CNN Model
- Streamlit App
- Presentation

02

Model



03
Streamlit App
